

Clear thinking in a complex world

The Guardian – Riots Survey

Fieldwork dates: 10-11th August 2011

GB Interview Method: Online

Population effectively sampled: All adults aged 18+ years

Sampling Method: In the UK, a nationally representative sample was selected at random from the NewVista™ panel of 200,000 adults, with sample selected in proportion to population distribution. Panel members are recruited via ICM's telephone and face to face surveys and via online recruitment and give detailed demographic and consumption data.

Sample size: 2,008

Data weighting: Data were weighted to the profile of all adults aged 18+. Data were weighted by sex, age, social class. Targets for the weighted data were derived from national sources in each country eg. National Readership Survey in the UK.

Questions: The computer tables attached in PDF format show each question, in full, in the order they were put to respondents, all response codes and the weighted and un-weighted bases for all demographics and other data including but not limited that published .

Further enquiries: martin.boon@icmresearch.co.uk

British Polling Council: ICM is a member of the British Polling Council and abides by its rules. <http://www.britishpollingcouncil.org/>
